

# SEDAR® Subscriber Update

## November 13, 2003

### Code Update (Version 007.001.013)

A SEDAR code update is scheduled for **November 17, 2003**. Its' size is approximately 1.6 MB and should take approximately 5 minutes to download using a 28.8K modem.

You are encouraged to obtain the code update as soon as possible on or after November 17, 2003 by following these procedures:

1. Starting the SEDAR program;
2. Selecting File menu; and
3. From the File menu, selecting Receive items from SEDAR server.

This method will help make sure that the application is updated and ready for your use before you actually have to perform any business functions.

This code update will bring the SEDAR client application up to Version 007.001.013.

Please be patient and **allow the download to complete before proceeding**. Once the code update has been downloaded, close the SEDAR program and follow the instructions below to execute the code update:

1. Click the Start button located at the bottom left corner of the screen;
2. Select Programs; and
3. From the Program menu, select SEDAR and then select Code Update.

### Summary of Code Update Changes

#### 1. Commission fee description change

The Commission des valeurs mobilières du Québec fee description has been changed as noted below.

“Copy of the press release pursuant to section 73 of the Act (\$85)”

now reads:

“Copy of the **material change report** pursuant to section 73 of the Act (\$85)”

#### 2. Adobe Acrobat Exchange 6.0, PDF 1.4

SEDAR will now allow filers to submit PDF documents that were created using the Adobe Acrobat Exchange 6.0 software that saves documents as PDF versions 1.2, 1.3 or 1.4.

### 3. Dialer Update

**Note: For Toronto and Montreal SEDAR Subscribers ONLY.**

AT&T has upgraded its dialup phone lines to accept the new V.92 modem standard. Because of this, users specifically using the USRobotics 5686D modem will not be able to connect to the AT&T network as of October 2003. If you are dialing into the Toronto or Montreal area numbers, and are having difficulties connecting, this may be the issue. Check with your IT department to verify whether or not you are using the above mentioned USRobotics modem. If so, customers should have their IT Department download and install the latest modem driver from the USRobotics website.

For additional information please refer to the August 2003 Press Release from AT&T at:
