### **XBRL filing program and request for volunteers**

On January 19, 2007, the Canadian Securities Administrators (CSA) issued a notice to the Canadian market announcing the launch of its eXtensible Business Reporting Language (XBRL) voluntary filing program and seeking issuers who are interested in participating in the program. The program will allow issuers to voluntarily file their financial statements in XBRL format on SEDAR in addition to the existing PDF format.

CSA Notice 51-323 *XBRL filing program and request for volunteers* provides information about the program and discusses the feedback from the market in the CSA's earlier survey on XBRL. Please contact one of the CSA staff members listed at the end of the notice if you are interested in volunteering in the program. A copy of the notice is available on the web sites of several CSA members.

XBRL is a relatively new business reporting language that is emerging as an international standard for communicating business and financial data. The basic concept of XBRL is that it attaches standardized electronic "tags" to elements of information and these tags provide information about what the item represents.

Please refer any questions you have about this notice or volunteering in the XBRL program to one of the following:
