Creating a Project

This quick reference guide provides information on how to assemble and submit a project using the Filing Management module. As a pre-requisite to this guide, please ensure the profile(s) you intend to file against are available in your Profile Management and they are up to date.

Please review the following quick reference guides for assistance if your Profile Management is empty and/or your profiles require updating:

- [Retrieving Existing Profiles](#) (includes steps for updating an existing profile)
- Creating a Profile

Pre-Filing Checklist

Before creating a project in SEDAR, please ensure the following:

- ✓ You know the category of filer, the category of filing and the filing type
- ✓ You know the recipient agencies and principal regulator
- ✓ The document is saved in PDF format and adheres to SEDAR's electronic formatting requirements (see Section 7.2 of the [SEDAR Filer Manual](#))
- ✓ The document name and file path does not include spaces or dashes

Summary Steps for Creating a Project

Below is a quick summary of how to create a project

- Select Create a New Filing in the Filing Management module
- Select your category of filer, filing and filing type
- Complete the required cover page and Page 2 if applicable to the Filing Type chosen
- Attach your profile(s), documents (pdf*) and (applicable) fees
- Submit, Authorize and Pay for fees as applicable

Once submitted, the project will display in your local Filing Management including a permanent project number and a time and date stamp.

Project and Submission Numbers

A temporary project number is assigned to each new filing and will remain the same for all filings within that project. All filings within the same project are also assigned a submission number starting with 00000001.

- Until submitted, project numbers begin with TMP (temporary) and submission numbers with SUB (submission).

- Upon submission, the SEDAR server assigns the filing a permanent project and submission number.

Note: If you wish to have copies of your organization’s filings available in your local Filing Management, please refer to the [Retrieving Existing Filings](#) quick reference guide for assistance.
